

Maha BOURADA

Fullstack developer

mahamarwabourada@gmail.com

Paris

mahabourada.github.io/Portfolio-v2.0/

French

Fullstack developer with strong expertise in React, TypeScript, Node.js, Express.js and SQL, I design and ship complete web applications end-to-end including a Chrome extension independently developed and currently being deployed to production at SNCF. Rigorous about code quality, testing and code reviews, I thrive in demanding agile environments where user impact and long-term maintainability truly matter.

WORK EXPERIENCE

Work-study program : Digital accessibility assistant auditor and developer

From September 2025 to September 2026

SNCF, Saint-Denis, France

- Conducted comprehensive accessibility audits on both websites (RGAA 4.1.2) and mobile applications (RAAM 1.1), combining manual and automated testing using specialised tools (NVDA, VoiceOver, ARC Toolkit, DevTools). Audit reports identified accessibility issues that were communicated to development teams for remediation.
- Independently designed and developed a Chrome extension from scratch automating the verification of RGAA 4.1.2 criteria (text alternatives, ARIA attributes, heading structure) — currently being deployed to production.
- **Technologies** : HTML/CSS, TypeScript, React, ARC Toolkit, Stylus, NVDA, VoiceOver

Internship : Fullstack developer

From May 2025 to July 2025

Paris 8 University, Paris

- Built a complete dynamic and accessible web platform for the ICH department, designed to strengthen its external visibility. Delivered both a public-facing interface and a secure admin panel with authentication, enabling the team to manage content independently.
- **Technologies** : React (Vite), Node.js, Express.js, MySQL, WCAG

SKILLS

Frontend (web & mobile)

HTML & CSS, JavaScript, TypeScript, React, Tailwind CSS, native Android

Backend

Node.js, Express.js, PHP

Data & Machine Learning

pandas, NumPy, matplotlib, seaborn, scikitlearn, Jupyter Notebook

Databases

MySQL, PostgreSQL, SQLite, Firebase, MongoDB

Project management

Planning (UML), SCRUM Agile, Jira, version control (GIT, GitHub)

Languages

Java, Python, C

Digital accessibility audit

- RGAA 4.1.2 (French accessibility standard for the Web)
- RAAM 1.1 (Luxembourg accessibility standard for the mobile)
- NVDA, VoiceOver (screen readers)

EDUCATION	Master's degree in Technology and Disability	From September 2024 to September 2026
	Paris 8 University, Paris	
	Master's degree in Software Engineering and Intelligent Systems	From September 2023 to June 2024
	Abdelhamid Mehri University, Constantine	
	Bachelor's degree in software engineering	From November 2020 to July 2023
	Abdelhamid Mehri University, Constantine	
PROJECTS	Web accessibility audit extension — SNCF	
	- Independently designed and developed a Chrome extension automating the verification of RGAA 4.1.2 criteria (text alternatives, ARIA attributes, heading structure) — currently being deployed to production. Technologies: HTML/CSS, TypeScript, React	
	Competitive e-Learning Platform for Machine Learning Challenges	
	https://github.com/MahaBourada/BotsCompete - Built a fullstack competitive web platform where users challenge each other on Machine Learning problems, featuring a real-time leaderboard and an engaging user interface. Technologies used: MySQL, React, Node.js, Express.js	
	Kaggle Challenge — Walmart Store Sales Forecasting	
	https://github.com/MahaBourada/Assurini-Admin - Developed a secure fullstack admin interface with authentication, role management and full CRUD operations on business data. Technologies: MongoDB, Express.js, React, Node.js (MERN)
