

Maha BOURADA

Fullstack developer

mahamarwabourada@gmail.com

Paris

mahabourada.github.io/Portfolio-v2.0/

Fullstack developer with hands-on experience in React, TypeScript, Node.js and Python, I design and ship performant, accessible web applications, including a Web extension currently being deployed to production at SNCF. Rigorous about code quality, testing and reviews, I thrive in demanding agile environments where user experience and long-term maintainability truly matter.

WORK EXPERIENCE

Work-study program : Digital accessibility assistant auditor and developer

From September 2025 to September 2026

SNCF, Saint-Denis, France

- **Objective :** Audit websites according to the French standard RGAA 4.1.2 and mobile applications according to the RAAM 1.1 standard.
- **Achievement :** Conducted accessibility audits in compliance with RGAA 4.1.2 and RAAM 1.1 through manual and automated testing, as well as the development of a web extension to assist auditors by automating the verification of several RGAA criteria.
- **Technologies :** ARC Toolkit, Stylus, DevTools (Browser Inspector), NVDA & VoiceOver (Screen readers)

Internship : Fullstack developer

From May 2025 to July 2025

Paris 8 University, Paris

- **Objective :** Attract potential collaborators by creating a compelling online presence for the ICH department.
- **Achievement :** Developed a dynamic, accessible website for the ICH department, featuring a securely authenticated admin interface for easy content modification.
- **Technologies :** React (Vite), Node JS, Express JS, MySQL, WCAG guidelines

SKILLS

Frontend (web & mobile)

HTML & CSS, JavaScript, TypeScript, React, Tailwind CSS, native Android

Backend

Node.js, Express.js, PHP

Data & Machine Learning

pandas, NumPy, matplotlib, seaborn, scikitlearn, Jupyter Notebook

Databases

MySQL, PostgreSQL, SQLite, Firebase, MongoDB

Project management

Planning (UML), SCRUM Agile, Jira, version control (GIT, GitHub)

Languages

Java, Python, C

Digital accessibility audit

- RGAA 4.1.2 (French accessibility standard for the Web)
- RAAM 1.1 (Luxembourg accessibility standard for the mobile)
- NVDA, VoiceOver (screen readers)

EDUCATION	Master's degree in Technology and Disability	From September 2024 to September 2026
	Paris 8 University, Paris	
	Master's degree in Software Engineering and Intelligent Systems	From September 2023 to June 2024
	Abdelhamid Mehri University, Constantine	
	Bachelor's degree in software engineering	From November 2020 to July 2023
	Abdelhamid Mehri University, Constantine	
PROJECTS	Web accessibility audit extension — SNCF	
	• Development of a Web extension automating the verification of RGAA 4.1.2 criteria (text alternatives, ARIA, headings) — currently being deployed in production. • Technologies: HTML/CSS, TypeScript, React	
	Competitive e-Learning Platform for Machine Learning Challenges	
	https://github.com/MahaBourada/BotsCompete • Development of a gamified web platform for Machine Learning challenges with real-time leaderboard. • Technologies used: MySQL, React, Node.js, Express.js	
	Accesspeak - Giving a voice through technology	
	https://www.linkedin.com/feed/update/urn:li:activity:7435808054748782592/ • Development of an Android application converting pictograms into natural language via NLP, integrated with the humanoid robot Pepper. • Technologies used: Android (Java), Python, FastAPI, Natural Language Processing (NLP), Seq2Seq, SQLite, Pepper SDK	
	Kaggle Challenge — Walmart Store Sales Forecasting	
	https://github.com/MahaBourada/Walmart-Recruiting-Store-Sales-Forecasting • Exploratory analysis and predictive modelling on 45 stores (2010–2012): weekly sales visualisation, holiday impact, economic factors (unemployment, CPI, fuel prices), and sales forecasting using a Random Forest Regressor. • Technologies: Python, Jupyter Notebook, pandas, NumPy, matplotlib, seaborn, scikitlearn
