C2

Skills

Frontend (web & mobile)
React, Tailwind CSS, Android natif, HTML & CSS, JavaScript, TypeScript

Backend
Node.js, Express.js, PHP

Databases
MySQL, PostgreSQL, SQLite, Firebase, MongoDB

Data & Machine Learning
pandas, NumPy, matplotlib, seaborn, scikitlearn, Jupyter Notebook

Languages
Java, Python, C

Project management
Planification (UML), SCRUM Agile, Jira, contrôle des versions (Git)

Digital accessibility audit

- RGAA 4.1.2 (French Web Accessibility Standard)
- RAAM 1.1 (Luxembourg Mobile Accessibility Standard)
- NVDA, VoiceOver (screen readers)

Atouts

Analytical mind
Rigorous
Ambitious
Teamwork

Interests

Video games
Photography
Drawing

Maha BOURADA

Fullstack developer

Fullstack developer with dual expertise in web and mobile development and digital accessibility, I deliver performant, secure and inclusive applications in demanding agile environments.

Education

- **Master's degree in Technology and Disability**
Paris 8 University, Paris From September 2024 to September 2026
- **Master's degree in Software Engineering and Intelligent Systems**
Abdelhamid Mehri University, Constantine
From September 2023 to June 2024
- **Bachelor's degree in software engineering**
Abdelhamid Mehri University, Constantine
From November 2020 to July 2023

Work experience

- **Work-study: Auditor in Digital Accessibility**
SNCF, Saint-Denis, France From September 2025 to September 2026
 - Independently developed a Chrome extension automating the verification of RGAA 4.1.2 criteria (text alternatives, ARIA attributes, heading structure). Conducted accessibility audits on websites (RGAA 4.1.2) and mobile applications (RAAM 1.1) through manual and automated testing.
 - **Technologies** : HTML/CSS, TypeScript, React, ARC Toolkit, Stylus, NVDA, VoiceOver
- **Stage : Développeuse Fullstack**
Université Paris 8, Saint-Denis, France From May 2025 to July 2025
 - Developed a dynamic and accessible web platform for the ICH department: public-facing interface and secure admin panel with authentication.
 - **Technologies** : React (Vite), Node.js, Express.js, MySQL, RGAA 4.1.2.

Réalisations

- Extension web d'audit d'accessibilité numérique — SNCF**
- Chrome extension automating the verification of RGAA 4.1.2 criteria (text alternatives, ARIA, headings) — currently in development.
 - **Technologies** : HTML/CSS, TypeScript, React
- Plateforme e-learning compétitive pour des défis en Machine Learning**
<https://github.com/MahaBourada/BotsCompete>
- Gamified web platform for Machine Learning challenges with real-time leaderboard.
 - **Technologies** : MySQL, React, Node.js, Express.js
- Assurini — Interface d'administration pour une compagnie d'assurance**
<https://github.com/MahaBourada/Assurini-Admin>
- Secure admin interface with authentication, role management and full CRUD operations.
 - **Technologies** : MongoDB, Express.js, React, Node.js (MERN)
- Accesspeak - Donner une voix grâce à la technologie**
<https://www.linkedin.com/feed/update/urn:li:activity:7435808054748782592/>
- Android application converting pictograms into natural language via NLP Seq2Seq, vocalized by the humanoid robot Pepper.
 - **Technologies** : Android (Java), Python, FastAPI, NLP, Seq2Seq, SQLite, Pepper SDK
